

What is Envirofill?

Envirofill was designed specifically for use in synthetic turf.

Envirofill is the top synthetic turf infill choice for your landscape applications, with health and safety advantages for people, pets, and playgrounds. You can also count on a more lush-looking, longer-lasting putting green when Envirofill's at play. With many benefits and proven results, Envirofill is the last infill you will ever need. Speaking of last, but certainly not least, Envirofill's Microban antimicrobial protection helps prevent the growth of bacteria, mold and mildew that can cause stains, odors and product deterioration.
